

Black Star Appraisals

Black Star deploys a full-cycle approach and holds a distinct advantage with extensive expertise and visibility within the construction, transportation, mining, agriculture and oilfield services related industries. Uniform Standards of Professional Appraisal Practice (USPAP) compliant reports are used for bank loans and financing, IDOT/DOT pre-qual/bonding, insurance, equipment and business sales, financial reporting, divorce settlements, estate planning and dispute resolution.

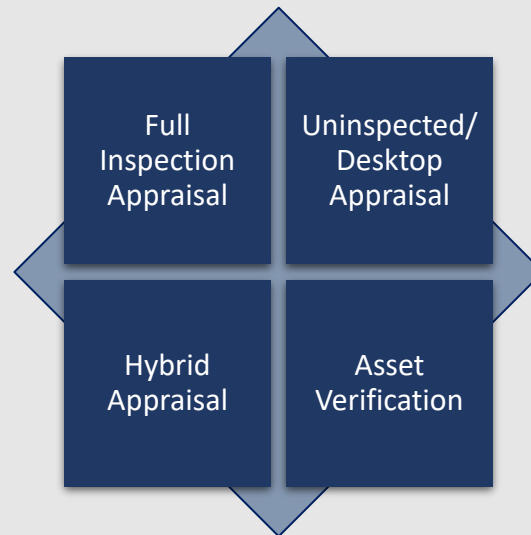

Accredited by the American Society of Appraisers (ASA) and the Equipment Appraisers Association of North America (EAANA), we provide our customers with the security of knowing that qualified industry professionals are appraising their assets.

Our Appraisal Services

Appraisers conduct an onsite inspection of assets.
Report includes detailed written equipment descriptions with verification of make, model, serial number, mileage/hours and photos of each asset.

Includes inspections of a representative sampling of assets combined with an uninspected (Desktop) report. Provides flexibility with pricing and timing.
Report produced will meet your due diligence.

Uses data supplied to Appraiser via the engaged client or company contact. No onsite inspection. The most cost-effective and time-efficient appraisal.

Verifies that assets exist and are at the specified location. Report includes pictures, descriptions, locations and conditions.
